Ms. Vipra Babbar, Head HR, Meero India
The Annual HR Conclave - Horizon’20 by DMS, IIT Delhi aims to bridge the gap between academia and the corporate world through experiences and insights from industry veterans in the Human Resources domain. The Industry Interaction Committee at DMS hosts the conclave. This year the morning session revolved around the discussion on how the management styles change in Human Resources domain Post the Pandemic.

"Change in Strategic Human Resource Management Post the Pandemic"

The topic introduction was given by Panel Chair Mr. Aditya Adyar. He asked all the panelists to give valuable insights on the topic and shed light on why the reality sector was fast catching up post the lock-down and also on the technological adoptions in the reality sector. Mr. Praveen Kamath took the discussion forward on how the pandemic has driven large organizations like TCS and Wipro towards digitization. Mr. Farhat Umar discussed the changes driven by technology in the workforce. He also elaborated on how pharma as a sector responded to the Pandemic. Mr. Sameer Tamhane shared his insights on the accelerated digitization that was affecting the workforce in the pharma sector. Ms. Komal Singh delved into the psychological journey of the employees during the pandemic.

Mr. Frederick Correa added insights about the changing perspective of employees has changed from lifetime employment to lifetime employability. Ms. Saumya Khare elaborated on the effect of the pandemic on the Gig Economy and its impact on the growth of Gig culture. Mr. Arnab Goswami delved into how performance is not just about ratings but about the career of a person and the importance of the roles of managers during the pandemic. Mr. Amit Jain discussed the performance management systems at PeopleStrong. Mr. Karan Barua shared his insights on the measures taken by the retail sector during a pandemic. Ms. Rajita Singh broadly outlined how this pandemic has forced us to go back to live with the basic necessities of life. Mr. Vinay Trivedi elaborated on the effects of the pandemic on start-ups and the changing scope of job roles to become permanent “from-home” jobs.

The session concluded with panelists answering many queries from the students adding many different viewpoints to the topic.

"Technology- Transforming Work, Workforce, and Workplace"

The afternoon session revolved around the discussion with a focus on how technology can transform workplaces and how technology can help and aid workforce.

The opening note was initiated by Panel Chair Ms. Radha Shrihari, who deliberated on the fastened digitization across the industries during the pandemic and on how the expectations from the employees will change post the pandemic. Mr. Harjeet Khanduja started the discussion by giving an example of algorithmic bias in the recruitment system of Amazon led to Gender Bias. Mr. Sandeep Batra took the discussion forward by giving the applications of new technologies in the retail sector and on how the retail sector was moving toward an Omni-channel, physical-digital space. Ms. Raksha Agrawal brought in a completely different perspective to the discussion and shed light on how India was going to be the next Big Hub of product companies.

Ms. Suchismita Burman talked about adopting the growth mindset and the steps of change management and digital transformation. Mr. Tejas Gokale gave insights on how Work from Home has enhanced the Talent Pool. Mr. Chetan Prakash brought in a new dimension about the impact of technology on the education sector and emphasized it is creating the same value and experience in a physical environment.

Mr. Guhan Ramanan stressed upon how Data is becoming the new Oil. He also talked about the ways in which biases can be eliminated from the recruitment process. Ms. Ankita Singh discussed finding the right balance between the nature of Humans and Robots, the need for co-existing and collaborating. Ms. Ankita Verma spoke about the difficulties faced by the employees of the banking sector, bringing in a new dimension to the discussion. Ms. Vipra Babbar talked about Human Resource Management in a Start-up like Meero and discussed how the Talent Strategy of the company is going to change due to the pandemic.

The students of DMS, IIT Delhi extend their heartfelt gratitude to all the panelists for taking their time out and sharing their valuable views during the discussions.
MORNING SESSION – Consulting

Mr. Nikhil Mundra, Associate Vice President, Avalon Consulting
Mr. Nitin Gupta, Head-Corporate Strategy, Ozone Group of Companies
Mr. Sourav Dutta, Head-Strategy & Corporate Development
Mr. Divyansh Nasa, Director, EY-Parthenon
Mr. Rohit Tiku, Chief Strategy & risk Officer, Tata Motors Finance
Ms. Megha Manchanda, VP-Team Lead Marketing, DBS Bank
The Annual Strategy and Consulting Conclave - Strategia’20 by DMS, IIT Delhi aims to bridge the gap between academia and the corporate world through experiences and insights from industry veterans from Consultancy and Strategy domains. The Industry Interaction Committee at DMS hosts the conclave.

"Is implementation a Real Deal? - Breaking the myth about Consulting"

This year the morning session on Consulting revolved around the theme of Consultants successfully implementing business strategies. The panel discussion was commenced by the panel chair, Mr. Nehul Malhotra. The discussion started with a note pointing out that it’s not necessarily “Strategy Vs. Implementation.” In fact, it is "Strategy and Implementation" with consultants figuring out the ambiguity in ground reality with a strategic bend of mind. Emphasizing the point that "Implementation without strategy is chaos" Mr. Ramachandran A pointed out the significance of a consultants’ prior experience to deliver new perspectives with an outer viewpoint. Mr. Niranjan Pandit mentioned the fact that only 2.5% of the projects are completed within time, price, efforts, and under the budget defined for the project. For a consultant, "It needs to be implemented" is the thought process that comes before "How it needs to be done," pointed out Mr. Ajay Pandey.

Mr. Sandeep Ghosh delved into outcome-based pricing and compensations for consultants and how they are compensated for their efforts in implementing the solution. Adding on to the discussion, the significance of strategy, implementation, and skills, Mr. Vijay Gogoi also talked about the importance of subject matter expertise for specific strategies. Mr. Sanjay Bhattacharya elaborated on how things are shifting fast from management consulting to technology consulting, with automation already playing a vital role in today’s world. Ms. Shamli Prakash pointed out how unprecedented conditions like COVID-19 have emphasized that a pure implementation view won’t work. Mitigating risks need skills for strategy and implementation. Drawing an analogy between consulting and raising a child, Mr. Amit Narayan talked about how any changes suggested by the consultants can be implemented only if the client wants them.

While concluding the discussion, it was highlighted that implementation requires strategy, vision, and adaptability which comes from a consultant’s experience.

“Dynamics of Strategy in a technology and data-driven world”

The panel discussion theme in the afternoon session on Strategy revolved around the importance of data-driven analysis for forming strategies. The whole discussion was wonderfully led by the panel chair Mr. Nitin Gupta, introducing the theme and building up a proper flow by connecting the views and thoughts from every speaker into the desired direction.

Following on the starting note, Mr. Anshuman Mishra shared from his experience the nitty-gritty ways in which data is used in making credit strategies. Mr. Divyansh Nasa shared his insights on how data is also crucial in leading mergers and that Pharma is a treasure trove of information willing to acquire companies for data M&As. Adding on, Ms. Megha Manchanda talked about how different strategy sets can be decided for different industries based on different data types. Discussing how decision-making improves because of data availability, Mr. Nikhil Mundra emphasized that data and AI-ML will not take away jobs but would rather improve the functioning.

Visualizing the era when data integration was at inception, Mr. R Balaji pointed out how not even 50% of the data has yet been exploited. Bringing in a new perspective to the discussion, he stated that data does not make decisions but reflects those decisions. Mr. Rohit Tiku added to the discussion that intuition still has a role to play even in the presence of sophisticated data interpretation tools. Connecting the whole topic with curiosity, Mr. Sourav Dutta brought in another dimension to the discussion. The session was concluded by talking about the need for a balance between data and strategy.

The students of DMS, IIT Delhi extend their heartfelt gratitude to all the panelists for taking their time out and sharing their valuable views during the discussions.
SAKSHAM 2020

The Annual CSR Conclave

November 8, 2020

Hosted by NIVAH
PANEL MEMBERS

Mr. Sarvashish Roy, Head of CSR, Bandhan Bank
Mr. Kuldeep Tripathi, Head–Sustainable Development & CSR Partnership, PruVisor
Ms. Kanika Pal, Lead–Sustainable Community Development (Prabhat) South Asia, HUL
Mr. Harsh Pandey, Assistant Manager-CSR, Bharat Petroleum Corporation Ltd
Ms. Asmita Satyarthi, Director/ Advisor to CEO, Wockhardt Foundation
Mr. Kumar Anurag Pratap, Digital Inclusion & Sustainability Leader, Capgemini
Mr. Anuj Agarwal, Chief Operating Officer, ICICI Foundation
Ms. Rachana Iyer, Head of CSR, IDFC FIRST Bank
Mr. Rohit Saroj, Deputy General Manager, CSR & Affirmative Action, TATA Motors Management Consulting Pvt Ltd
The social sector arm of The Department of Management Studies, IIT Delhi, NIVAH aims at sensitizing the MBA students by creating awareness about societal issues to build future leaders. The Annual CSR Conclave-Saksham is one such initiative towards that aim. The objective is connecting with the corporate world and understanding the significance of creating a valued atmosphere in organizations rather than just a responsibility-sharing model.

This year Saksham 2020 was hosted by Team NIVAH virtually on 8th November. The theme for this year’s panel discussion was “Aligning sustainability goals of organizations with CSR activity in a post COVID world.” The discussion was led by the panel chair Mr. Sarvashish Roy. Taking examples from the necessary actions taken during the current pandemic, he added diverse perspectives into the discussion by giving valuable insights from his association with Bandhan Bank.

Leading the discussion in the direction of the importance of collective responsibility, Ms. Asmita Satyarthi emphasized that to lessen the magnitude of the world’s issues in these trying times, each individual must contribute in every possible way. She laid down the significance of becoming the agents of change and viewing the pandemic as a learning opportunity and leveraging it to bring about refinement in our ways and actions. Mr. Harsh Pandey spoke about increasing corporate consciousness. He mentioned how companies have been rendering a helping hand to communities by identifying the cause of their problems and providing viable solutions. Due to several unprecedented situations that businesses might encounter, he talked about the advantages of having long-term perspectives and planning.

Highlighting how every individual’s contribution can help solve community problems, Mr. Kuldeep Tripathi emphasized the importance of working together as an ecosystem for the greater good. Talking about how India has responded successfully to the pandemic, Mr. Anuj Agarwal reminded us all of the beautiful tradition of philanthropy in Indian history. He further discussed sustainability and the three pillars that hold it together - economic development, social responsibility, and the environment. He talked about the stark difference between urban and rural and highlighting that most of the growth happens in India’s urban areas. Therefore, there is a need to shift our focus to rural as more than 60% of our population lives in rural areas.

Ms. Rachana Iyer brought notice to the fact how CSR has started getting much attention in recent times. She also talked about how the current scenario has pushed CSR enthusiasts to go out of their way in helping the masses while holding hands to face the pandemic together. This, in turn, has created a need for NGOs to shift their operations online. Mental health and its significance were also discussed while highlighting how parents are a child’s best therapist. Reminding everyone how we have been through multiple pandemics before, Mr. Rohit Saroj ignited hope that we would soon come out of this phase as well, turning everything back to normalcy. He also emphasized the importance of devising and focusing on long term objectives and goals.

Ms. Kanika Pal discussed how we have become more connected emotionally due to the pandemic and that organizations need to be very careful and sympathetic with their employees. If we look at the big picture, communities need to become sustainable rather than organizations. Mr. Kumar Anurag Pratap broadened the discussion by adding how the pandemic has impacted people differently, with people at the bottom of the pyramid being affected the most. Empathy at the right place and time is of utmost importance while ensuring that workers are paid well and on time. Only then can we assume that CSR activities are working as expected.

DMS, IIT Delhi, wants to thank all the panelists for taking out their valuable time and conducting such an enriching discussion. With the aim of sowing seeds of social responsibility and the dedication to contribute selflessly to the society DMS, IIT Delhi always looks forward to conducting such interactive industry interactions.

"Aligning sustainability goals of organizations with CSR activity in a post COVID world"
MANTRA 2020

The Annual Media and Marketing Conclave

November 8, 2020

Hosted By
Media and PR Cell
PANEL MEMBERS

Ms. Shweta Srivastava, Head Of Digital Marketing, Dr. Reddy’s
Ms. Sumeli Chatterjee, Vice President - Brand, The Times of India
Ms. Bhuvana Subramanyan, CMO, Randstad India
Ms. Swati Parashar, General Manager - Corporate Marketing, ITC Infotech
Mr. Apurva Chamaria, SVP & Chief of Staff to CEO & MD, Tech Mahindra
Mr. Rajesh Kumar, VP Marketing, Uipath India & South Asia
Mr. Jiten Mahendra, Vice President, Landmark Group
Mr. Rajiv R. Gupta, VP - Sales & Marketing, Honda Cars India Ltd
The Annual Media and Marketing Conclave aims to engage and connect students with prominent distinguished business leaders in the field of Media and Marketing. This year Mantra 2020 was hosted by the Media and PR Cell, virtually on 8th November. The theme for this year’s panel discussion was "Changing Marketing Strategies: Globalization to Glocalization."

The opening note was delivered by Ms. Sumeli Chatterjee where she elaborated on the topic of discussion and how Glocalization is relevant to the present context. She further detailed the varied experiences of people from different sectors and how localization varies in different sectors, opening the discussion for other panelists.

The discussion was taken forward by Mr. Rajiv Gupta, who focused on the need for specialized Glocalization. Further, he elaborated on the aspects such as how consumers are different in various needs and on the importance of analyzing key buying factors which help in Glocalization. He also stressed the importance of understanding the What and Why of the consumer.

Mr. Jiten Mahendra focused on bringing the Core Proposition Value of the brand into the picture and elaborated on how it is different in different regions across the world. He also brought to light the brand relevance to the audience and the customer connects of the Glocalization. Mr. Rajesh Kumar brought in a new dimension by bringing the differences of Glocalization in the B2B and B2C markets. He also focused on the factors relating to customer standpoint from B2B and B2B markets.

Ms. Swati Parashar delved into the importance of gathering data on customers to understand their behavior. She also touched on the Glocalization in the services industry and the factors that come into play when understanding consumer behavior in the services domain. Bringing in a different dimension on customer diversity, Ms. Shweta Srivastava elaborated that customer diversity is one of the key factors in the Glocalization. She also delved upon the changed scenario of Glocalization in regulated markets such as pharmaceuticals and how data-driven insights will be a backbone for finding customer insights in these kinds of markets.

Focusing on the IT and Technology Services Industry, Ms. Bhuvana Subramanyan brought in the perspective of Tech business with respect to Glocalization. She also elaborated on the importance of the connection between global brand value and the product being sold in the local market. Mr. Apurva Chamaria focused on the idea of personalized products for the customers and how localized products are aiding the personalization. He also stressed the importance of spending time with customers for Glocalization to take place.

The Q & A session took the interaction between students and panelists further and generated many key insights for the students to take-away. Overall, the event is a huge success with students experiencing many perspectives and opinions from the esteemed panelists.

The students of DMS, IIT Delhi extend their heartfelt gratitude to all the panelists for taking out their precious time & giving us an opportunity to learn about the needs of Glocalization in the contemporary marketing world.

HUMANS OF DMS

Getting to know your virtual batchmates

In this edition:
Get some tips to ace those case competitions from our Campus Winners from the batch of MBA 2020-22
Passionate about football and cricket, Mohit is a Mechanical Engineer from NIT Jalandhar with three years of work experience as a Product Development Engineer. Our adventurous bloke is a travel enthusiast with a knack for reading.

Mohit embarked on this two-year MBA journey with an aspiration to be at a top-level position, where you can impact the organizations through strategic business decisions.

Related to management, his interests lie in operations and marketing. Operations and Supply Chain Management are the actual revenue generators and the end goal of any business, while marketing helps understand the impact on the audience and market.

On the path to winning any case competition, the first and most crucial step is team formation. Along with having equally motivated team members, Mohit emphasized the importance of having like-minded people in the team to ensure proper coordination without any barriers. There should be a sufficient comfort level among the team so that even organizing meetups is never a hassle. He added that it is also essential to have team members proficient in different domains. Another aspect he highlighted was the need to prioritize between multiple case competitions running simultaneously. It would be best to analyze your team’s strength to figure out which path has a higher probability of leading to victory. Setting targets helps you achieve them with full dedication. The aim should always be to clear as many rounds as possible.

According to Mohit, the secret to having a continuous winning streak is that first win, followed by building on that structure with the learnings and experience. A visually appealing presentation gives your team an advantage in the initial stages since the evaluators must skim through thousands of submissions.

Two of the most used words from the MBA dictionary, primary and secondary research, is the first step in the structure that Mohit follows while approaching the cases. This is followed by finding resources, risk analysis, challenges, business impact, and implementation. He emphasized that these competitions are not only an evaluation, but the companies are also looking for the viability of your solutions. Therefore, always keep in mind what the companies are looking for, and your solution should resolve that problem.

Sharing his experience on a virtual MBA from DMS, Mohit prides that he has been able to turn this into an opportunity. From being the interim CR to being a part of the coveted placement committee and winning several case competitions, he has already ticked several boxes from the B-School manual. Initially apprehensive about the quality and experience in a virtual medium, he is now grateful for how smoothly things have been functioning online at DMS. As a parting note, he advised that we must take advantage of this virtual medium to upskill ourselves as much as possible. Besides this, he is always approachable and very enthusiastic about partnering with people for any initiatives related to DMS or otherwise.
Although, I haven’t met any of my peers, I can still feel a strong connection with them. I believe that, as a batch, we’ll surely sail through, given we stand strong and together.

A passionate writer and poetry lover, Surmeet graduated from NIT Bhopal in Electronics & Communication Engineering. She hails from Jabalpur - “The City of Marbles” and loves penning down her thoughts.

With an inclination and passion towards Operations and Supply Chain Management, Surmeet started her MBA journey after having worked for about 2 years as a Senior Engineer for Operations and Tendering at L & T Construction. The fascination for Operations grew during her time of working at L & T.

Understanding that she is not equipped to her best potential to take major business decisions in her current role, she decided to pursue her MBA and finally stepped into DMS, IIT Delhi.

While sharing her approach on how to solve the case competitions, she says she was initially not adept in solving cases. But with focused preparation, she was able to overcome the incognizance around the case competitions. She shares that she started by reading the book “Case in Point” by Marc Consentino, which helped her to understand the dynamics of the case competitions and how to approach them. She also says initial brainstorming and discussion with the team members is crucial as it brings out fresh perspectives and approaches to arrive at a solution to the case.

Emphasizing on the methodology she follows, she says there is a four-fold approach she takes for solving any case study. The primary step is to read and understand the case given to us, till the contents are clear to us. Then she focuses on identifying the pain points, that are required to be solved, by brainstorming with the teammates till they are clearly identified. After a clear picture of the pain points, she says to concentrate on applying the predefined frameworks that are available for different streams. Finally, conclude with a solution that exactly solves the problem given to us.

Sharing her learnings from the case competitions, she says the team should be equally motivated to win the competition and this is a very crucial aspect. She also emphasizes, the team should be ready to put in as much effort as possible and says this will always work out in the end! Finally, she stresses to participate in more of them, as the learnings during those competitions are very significant for our MBA journey. When asked to share tips on slide deck preparation, she says being concise, creative, and unique is the holy trinity of a slide deck.

Commenting on her MBA experience, she feels the journey till now has been pretty exciting! Going by the ideology “Every new day is a new opportunity for Success”, she thinks new challenges and opportunities each day have helped in pushing herself beyond the limits. Albeit the MBA course being virtual, she feels a strong connection and bonding with the fellow DMSians has already been made. She firmly believes that as a batch we will surely sail through, with our determination and camaraderie.

Giving her closing remarks, she sends her best wishes to the entire batch and says she is always approachable to the fellow batchmates for anything they wish to share.
